

Monitor any bakery line with LeMatic's integrated Camera and NVR Systems that allow you to view locally from the plant or off-site and get real-time visibility. Or, with recordable video, look back in time to review operation history. Adding a camera system not only provides greater insight into line productivity, it saves valuable time and travel expenses.

FEATURES:

- Integrated camera and NVR system
- View from the bakery or off-site
- Fixed adjustable to areas of specific interest
- Standard system can accommodate up to eight cameras
- Single IP address to view and control all cameras
- Recordable video
- Records until full, then overwrites oldest video
- Standard system includes a 2TB data storage system
- Optional 8TB hard drive available
- Mobile app support

Total production monitoring when and where you need it most

Watch line production in real time; in-plant or off-site
