

WHEN AN UPGRADE IS THE SMARTER CHOICE

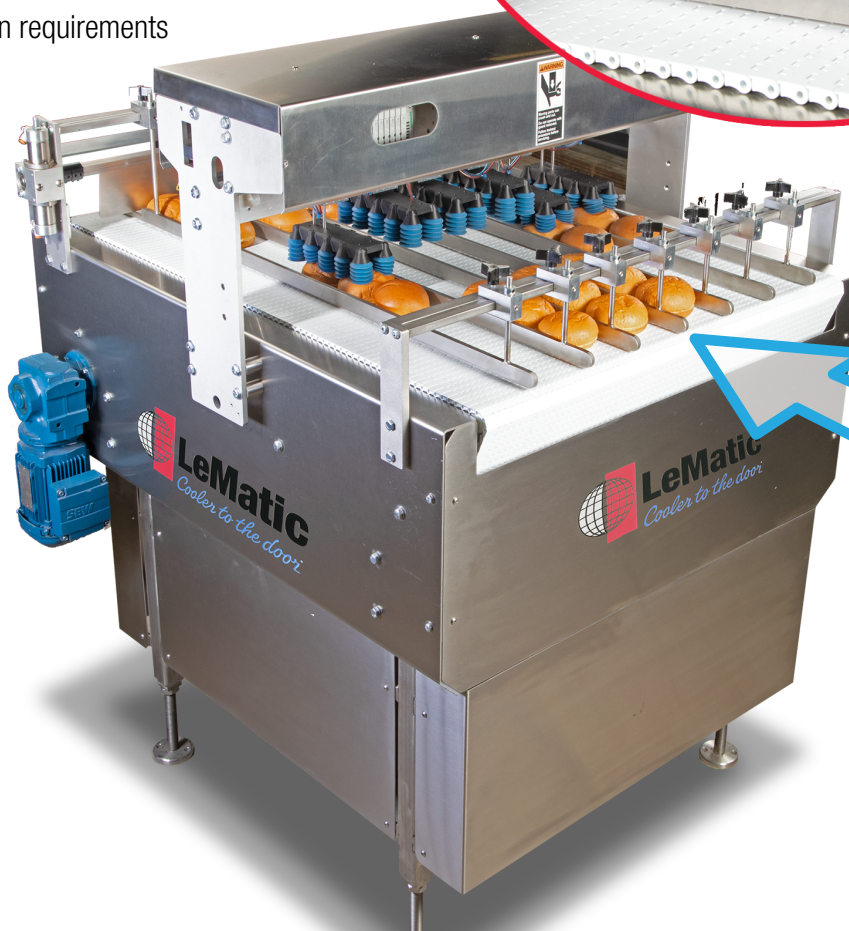

Independent Hold-Downs

Limits Product Lane Backpressure

Plagued by lane back-ups and inaccurate product counts? LeMatic's fully-adjustable Independent Hold-Downs keep a variety of products under control, avoiding costly down time on your slicing line. Additionally, they can be configured to fit any slicing machine, even our competitors.

FEATURES:

- Fully-independent lane hold-downs
- Individual lane sensors detect lane level and actuate individual holddowns to reduce back pressure by lane into the grouper
- Reduces lane pressure from backed-up product
- Reduced damage to product from build up of pressure
- More accurate product counts due to less product compression
- Variety of cups and pads available to best suit your specific production requirements
