

LeMatic's versatile Seal and Cut options allow you to separate most any bulk-packaged products into separate sealed sections, keeping unused product fresh and reducing product waste for the end user.

FEATURES:

- Full array of seal and cut options available as an upgrade to LeMatic's LS133 Bulk Packaging System, while limited seal and cut options can be added to the smaller LS3 Bulk Packer
- Many versatile packaging configurations
- Separates product into separate sealed sections, with an optional cut or perforation
- Allows for end-users to utilize only the product they need – when they need it

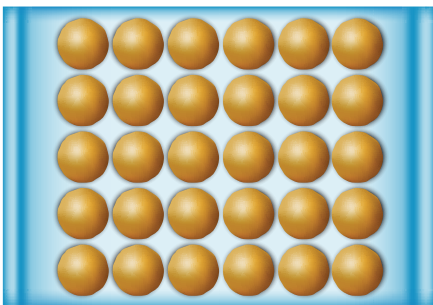

Don't see your exact package configuration? Just ask!

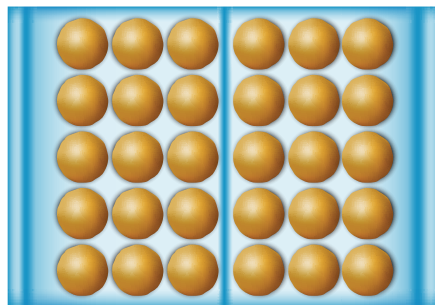

SEAL & CUT OPTIONS

A classic bulk package seal allows product to move about the package. Once the package is opened, freshness of all product is compromised. Adding additional seals placed where you want them, helps keep product fresher longer.
