

LeMatic
AUTOMATION FOR BAKERY

Airless Bandseals

FEATURING THE LATEST SEALING TECHNOLOGY

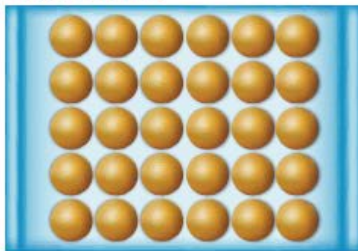

Supporting our customers priority on sustainability, LeMatic is committed to continuing advances in sustainable products. Our innovative, industry leading, Airless Bandseals replace existing air seals, eliminating the need for compressed air. Designed to reduce operating and maintenance cost. The Airless Bandseals can be retrofitted to existing LeMatic bulk packers as well as other manufacturers.

FEATURES

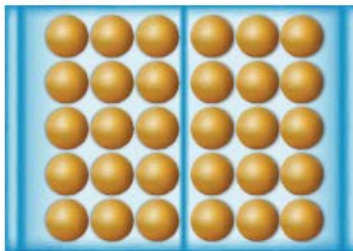

- Up to 100% reduction in air consumption for sealing
- Provides excellent seal at a reduced operating cost
- Noise reduction of up to 10 db
- Allows for flatter, more consistent seals
- Cools off quickly in between uses
- Reduces "heater burnout"
- Heats up quickly eliminating the need to keep units running in "standby" to keep air heaters hot
- Side, Center, and Mid Seal options available
- In-line seal and cut replaces double seal
- Retrofittable to existing LeMatic models
- Stand alone solutions offer the potential to upgrade customer's existing competitors models
