

# HolaRoof

## Framing system that turns solar panels into a roof

Universal Fit

### Works with Any Panel

Not locked into proprietary panels. Choose from any standard solar panel manufacturer and get the best price for your project.

10° - 90° Range

### Fits Most Roofs

From low 10° slopes to vertical 90° installations, HolaRoof adapts to your architecture without compromise.

Modular Design

### Quick Installation

Pre-assembled components and smart design mean faster installation times. Less labor cost, quicker payback for you.

## Beautiful

For a clean, modern aesthetic.

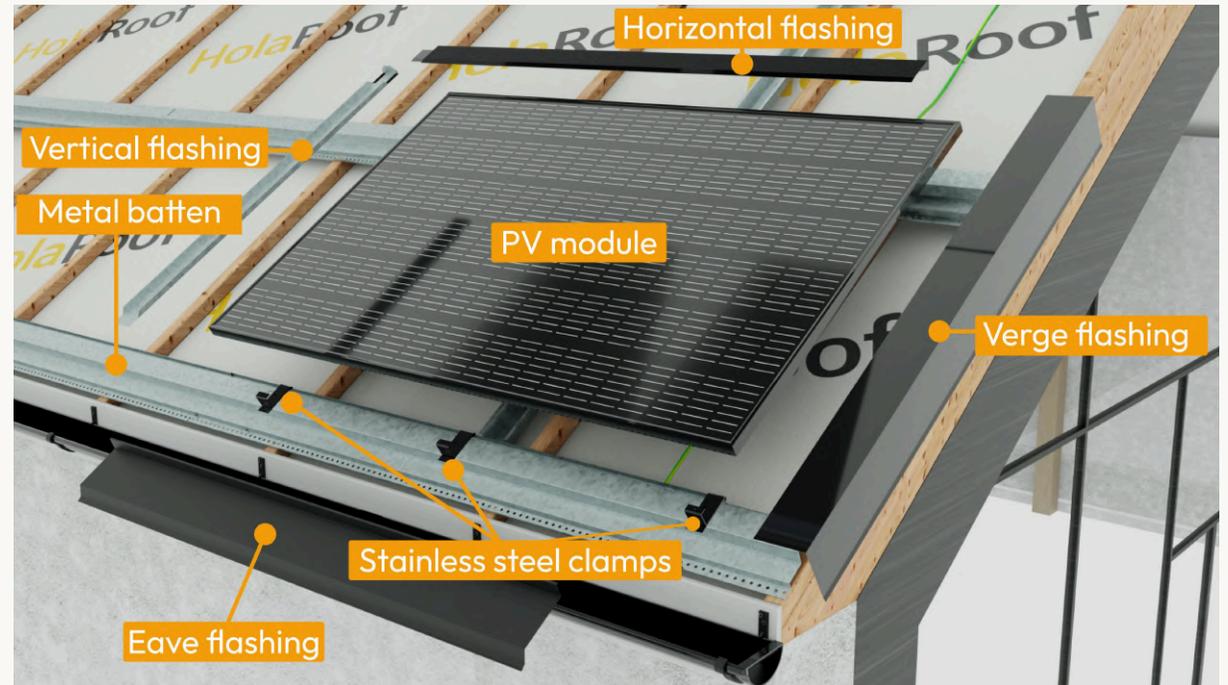

## Roof for Decades

Galvanised components for long-term reliability.

## For Modern Homes

Perfect for contemporary residential architecture.

### 1 Metal Battens

Strong steel framework that forms the foundation

### 2 Solar Panels

Your choice of any standard solar panel

### 3 Flashings

Precision waterproofing protection

## How It Works

## Built to European Standards

**EN 50583**

In-roof PV integration requirements

**EN 13501-5**

Roof fire classification

**EN 1991**

Structural actions: wind & snow loads

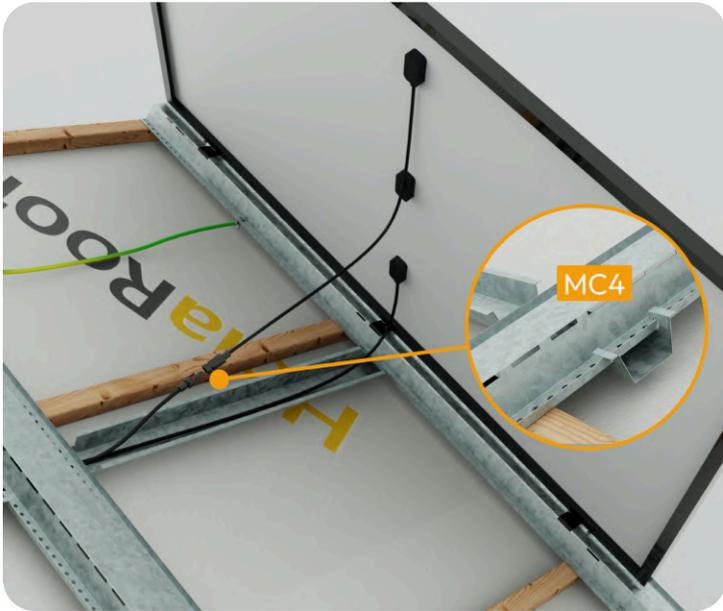

**IEC 62548**

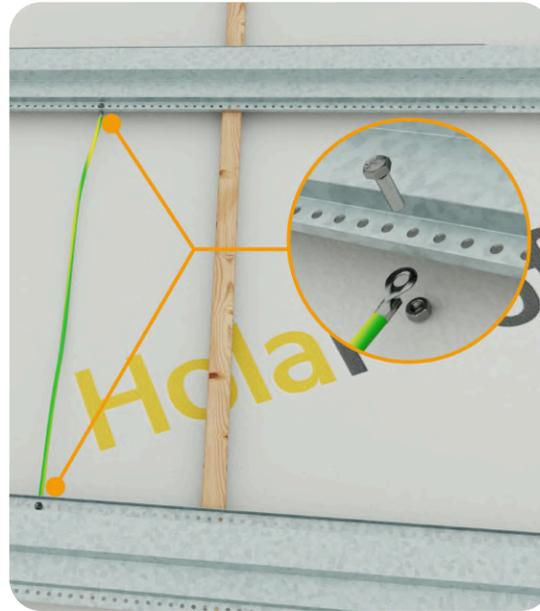

PV array installation & cable management safety

## Facts & Figures

<b>Roof Slope Range</b>	10° - 90°
<b>Construction</b>	100% Metal
<b>Panel Orientation</b>	Landscape
<b>Material</b>	Galvanized Steel
<b>Fire Rating</b>	BROOF(t1)
<b>Panel Types</b>	Universal
<b>Warranty</b>	Comprehensive

**Safe Cable Management**

**Grounding**
